Caring for  
the future

Along with producing paper hot cups of the Future Smart™ paper board we at Huhtamaki decided to start producing Food to Go food containers in same sustainable material to give our customers new option to the food containers.

**Huhtamaki**

The Future Smart™ PE coating is made from plant-based renewable materials.

## Food to go container

Item	CGRVA5269	CGRVA5270	CGRVA5268	CGRVA5271

The world is changing for the better. New materials and technologies lead to new solutions that significantly reduce dependence on fossil oil-based materials and offer more consumer choice and chance to enhance brand experience.

Huhtamaki Future Smart™ food container is the first 100% renewable paper container made from plants.

Raw material  
from PEFC  
certified forrest

No carbon content older  
than 100 years  
(verified by the 14C  
carbon dating method)

Plant-based PE  
coating

Environmental  
freindly sollution

### **100% renewable cups**

Huhtamaki Future Smart food containers are made of 100% renewable plant-based materials and contain no carbon content older than 100 years as verified by the  $^{14}\text{C}$  carbon dating method.

### **100% plant based**

Future Smart containers use sugarcane plant-based coating to protect paperboard fibers against moisture and to assist high quality sealing of the paper cup. Future Smart paperboard is also 100% GMO free.

### **PEFC certified**

Future Smart food containers and lids are made of paperboard from PEFC certified renewable sources. The products made with Future Smart material present a giant leap forward in sustainable packaging with the use of plant based PE coating, 100% renewable materials and fiber sourced from sustainably managed forests.

### **Perfect for takeaway**

Suitable for both hot and cold food. Huhtamaki Future Smart paperboard with bio-based coating is the perfect business reason to renew your takeaway food packaging.
